

SAQIB AHMAD SIDDIQUI

AI/ML & Software Engineer

+92 310 7274227 | ahmadsiddiquisaqib@gmail.com | linkedin.com/in/saqib-ahmad-siddiqui
github.com/saqibahmadsiddiqui | saqibahmadsiddiqui.vercel.app | Lahore, Pakistan

PROFILE SUMMARY

Software Engineer and AI/ML Engineer with hands-on experience in Python, SQL, and Databases. Specialized in Artificial Intelligence and Software Engineering, with practical knowledge of SDLC, Machine Learning, data analysis, and RAG. Proven ability to design and deliver efficient, scalable solutions while collaborating effectively across teams. Coursera certified in RAG and Generative AI, with strong fundamentals in Deep Learning, Data Structures & Algorithms, and REST API design. Passionate about leveraging data-driven insights and emerging AI technologies to solve complex problems and drive growth.

SKILLS

- **Programming Languages:** Python, Java, JavaScript, SQL
- **Backend:** FastAPI, Rest API, Microservices
- **Frontend:** Next.js, TailwindCSS
- **AI/ML:** Generative AI, LLMs, RAG, ML Fundamentals, DL Fundamentals
- **Databases:** PostgreSQL, VectorDB, Oracle DB, SQL Query Optimization
- **DevOps:** Git, CI/CD, Docker Basics, MLOps
- **Tools & Frameworks:** LangChain, GitHub, Google Colab, Hopsworks, Oracle EBS, Oracle APEX

PROFESSIONAL EXPERIENCE

Data Science Intern | [10Pearls](#) | Dec 2025 – Feb 2026

- Analyzed more than 5000+ rows dataset and engineered 40+ features, improving model performance by 90%
- Developed and evaluated machine learning models using Python, Pandas, NumPy, and Scikit-Learn
- Communicated with others to understand problem requirements and deliver data-driven solution
- Performed EDA, data preprocessing, and feature engineering, on large dataset
- Assisted in building and deploying ML pipelines as part of end-to-end data science workflows
- Developed and deployed a Streamlit dashboard to visualize model predictions

ERP Intern | [US Group](#) | July 2025 – Aug 2025

- Developed and integrated reports and forms using Oracle EBS and Oracle APEX
- Wrote and optimized SQL queries for database design and Oracle SQL database operations
- Supported Oracle Forms and Oracle Reports integration and customization
- Built cross-platform website using Oracle APEX

PROJECTS

Docu Sense | aidocusense.streamlit.app | github.com/saqibahmadsiddiqui/DocuSense

- Developed DocuSense, a full-stack Retrieval-Augmented Generation (RAG) application capable of processing and analyzing single or multi-PDF document uploads in real time.
- Engineered an efficient document indexing pipeline utilizing LangChain for text chunking and FAISS VectorDB to enable high-speed semantic search.
- Integrated GroqAI API to power a responsive, context-aware conversational chatbot interface, blending document-specific data with generative LLM insights.
- Deployed the production-ready MVP on Streamlit Cloud, ensuring a clean, intuitive, and highly accessible user interface for end-users.
- **Tech Stack:** Python, LangChain, GroqAI API, FAISS VectorDB, Streamlit

AQI Forecasting System | multan-aqi.streamlit.app | github.com/saqibahmadsiddiqui/aqi-forecasting-system

- Built a data science application that predicts the average Air Quality Index (AQI) of Multan in categories 1 to 5 for the next 3 days
- Implemented five machine learning models that retrain daily on live data from May 2025 to the current date, with automatic best-model selection based on F1_Score

- Designed and deployed a full MLOps pipeline using Hopsworks for feature store and model registry, deployed on Streamlit Cloud
- **Tech Stack:** Python, Pandas, NumPy, Scikit-Learn, MLOps, Hopsworks, Streamlit, FastAPI

Personal Portfolio Website | saqibahmadsiddiqui.vercel.app | github.com/saqibahmadsiddiqui/portfolio

- Developed a fully dynamic, open-source portfolio website with an admin dashboard for managing all content without code changes
- Built a RESTful backend API using FastAPI (Python) with PostgreSQL (NeonDB) for persistent storage of profile, projects, skills, and experience data
- Designed a responsive frontend using Next.js 14, TypeScript, and Tailwind CSS; integrated email validation via ZeroBounce API and contact notifications via Nodemailer
- Deployed frontend on Vercel, backend on HuggingFace Spaces (Docker), and database on Neon; implemented CI/CD practices for automated deployment
- **Tech Stack:** Next.js 14, TypeScript, Tailwind CSS, FastAPI, Python, PostgreSQL, NeonDB, Vercel, HuggingFace Spaces

EDUCATION

BS in Computer Science [NFC Institute of Engineering & Technology \(NFC-IET\)](#) Multan, PK 2022-2026

- **CGPA:** 3.90/4.00 (7th Semester)
- **Relevant Coursework:** Programming Fundamentals, OOP, Data Structures & Algorithms, Design and Analysis of Algorithms, Database Systems, Operating Systems, Software Engineering, Probability and Statistics, Linear Algebra, Artificial Intelligence, Parallel & Distributed Computing, Natural Language Processing, Machine Learning, Data Science & Big Data Analytics.

Intermediate in Computer Science (ICS) [Government Emerson College](#) Multan, PK 2020-2022

CERTIFICATIONS

Project: Generative AI Applications with RAG and LangChain – [Coursera](#) June, 2026

Introduction to Retrieval Augmented Generation – [Coursera](#) June, 2026

Python for Everybody – [Coursera](#) June, 2026

Business Communication & AI for Professionals – LUMSx & PepsiCo. November, 2025
